

If you have one of the following non-rectangular shaped windows that you want a solar screen built for; using your worksheet you simply get the width and height measurement for that window and plug those numbers into your worksheet as a window and add the following additional cost based on the shape of your window.

= Arched Windows, +\$20ea

= Angled Windows w/ straight pitched edge(s), +\$35ea

= 2'-4' wide Circle, Oval, Octagon Windows , +\$75ea
